

Roberto Coin

Project Type: Custom Luxury Retail Environment

Location: Miami, Florida

Services Provided: Design, Construction Drawings, Fabrication, White Glove Installation, Ongoing Maintenance

For its ninth U.S. boutique, Roberto Coin chose to build in Miami's Design District. Gilbert was tasked with creating a way to grasp the Roberto Coin aesthetic and incorporate it into the bright, buzzing streets of Miami.

We converted Roberto Coin's two-story building into a single-floor space, creating luxurious high-ceilings, and imparting the store with a light, airy atmosphere. Walking into the storefront, visitors pass a space that mirrors Roberto Coin's trademark Pois Mois' iconic

pieces. Whilst standing beneath a striking chandelier that looks as if gold flakes are falling from the champagne-colored archway, visitors can see straight through to the branded back wall, inspired by Roberto Coin's signature dark brown style.

Overall, the collaborative project between Roberto Coin and Gilbert was a success, attracting shoppers that enjoy luxury and fine jewelry, and giving Roberto Coin a trendy refresh inside one of the Miami's hottest retail destinations.
